

ENTODON ABBREVIATUS (Bry. Eur.) Jaeg. var. **TURDESCENS** Thér.,
var. nov.

Caules et rami turgidi, folia 2.2 mm. X 1.3 mm., valde concava.
cochleariformia, rete laxiore, cellulis mediis 70-90 μ . X 9 μ .

Valle de México: Contadero (*Bro. Amable 1362*).

The facies of this variety is very different from the usual forms
of *E. abbreviatus*. In its leaves and their areolation it comes close to
Pringle's no. 15226, identified by Cardot as *E. brevipes* (Schimp.)
